

# Watch with more intelligence.

HDTV, set-top boxes, DVD, digital TV. They're all on the rise. So no matter what people like to watch, the latest microchip technology lets them watch on bigger, better, smarter TVs.

STMicroelectronics is the world's leading supplier of MPEG-2 technology for high-definition and digital television. The number one supplier in dedicated chips for set-top boxes for cable and satellite TV. And ST is also one of the world leaders supplying the growing DVD market.

Even more innovations are on the way, so you'll want to stay tuned.

**We put more intelligence into everything.**

STMicroelectronics (formerly SGS-THOMSON) • A world leader in semiconductors for consumer products, automotive, telecommunications, computer peripherals, industrial automation and control systems • Ninety-five locations on five continents • [www.st.com](http://www.st.com)
